

Features:

- Cleans, Shines & Protects
- Improves Panel efficiency
- Eco-friendly, biodegradable formula
- Solvent free (water-based)
- Proudly produced locally in Kenya
- **Exclusive to CP Solar**

Applications:

This Solar Panel Cleaner solution is highly concentrated, non-solvent compound that can be used to wash Solar Panels. It leaves Solar Panel surface area clean, shiny, while at the same time protected from possible damage through the use of harsh detergents and solvent based cleaning agents.

Its well formulated agents make it easy to clean all kinds of dirt on panels. With regular use it helps improve solar electricity generation.

DILUTION RATE

Light Dirt	1:200 (0.5% Solution)
Stubborn Dirt	1:100 (1% Solution)

Always wash panels when they are cool, preferably in the early morning hours to minimise thermal stress on the photovoltaic cells and protective glass.

**AVAILABLE IN
5L & 1L SIZES**
